

Selecting the Perfect Commercial Table Base and Top

A guided journey with questions to help
you make confident, informed choices.

eCLIPSE
FURNITURE

Step 1: Define the Purpose and Environment

Every great table choice starts with knowing where and how it will be used.

Ask Yourself...

1 Where will this table be used?

Outdoor furniture will require weather-resistant materials like aluminium or high-pressure laminate. High-traffic environments will need durable, easy-clean surfaces and stable bases to prevent wobbling.

2 What kind of usage will it see?

Dining tables should combine stability with easy maintenance, ensuring they hold up to frequent use and cleaning. In busy restaurants, solid bases and surfaces that support quick turnover help keep service smooth.

3 Will it need to be moved or stored often?

These answers shape every decision that follows.

Step 2: Choose the Right Table Base

Your base determines stability, style, and compatibility with chosen table top and seating.

Ask Yourself...

1 What height do I need?

Type	Base Height	Typical Use
Coffee	43cm - 45cm	Casual lounge tables
Dining	71cm - 73cm	Standard dining tables
Mid	88cm	Counter height tables with mid-height stools, ideal for casual elevated dining
Poseur (Bar)	107cm - 108cm	High tables for standing or with bar-height stools

Consider the purpose behind each table, and how different heights will complement one another across the space. The right blend of heights not only supports comfort and function but also defines the character of your venue and the way people move through it.

2 What material suits the environment?

Will it face moisture, heat, or outdoor exposure?

Make sure you choose a table base that's manufactured from materials that are suited to your environment.

For indoor use, most types of bases will work, but you might want to consider something lightweight that's easy to move such as aluminium.

If you're using your tables outside, be sure to opt for a weather-resistant base made from materials such as aluminium, galvanised steel or polypropylene.

3 What style fits the space?

Single Pedestal with Square/Rectangular Plate

Double Pedestal with Rectangular Plate

Single Pedestal with Round Plate

Single Pedestal with Cross Base

Ornate

Trestle Legs

Cross Base

Four-Legged Base

Flip-Top

Commercial table bases are available in a wide range of shapes and style. Choose one that complements your environment, layout, and brand aesthetic. Often, round table tops will look better with a round base, and a square top with a square or rectangular base, but it's entirely up to you! It's also worth considering chair placement when selecting a base. Some styles - such as those with flat plate bases - make it easier for chairs to fit comfortably under tables without obstruction.

4 Do I need storage or mobility features?

Nesting base

Stackable design

Modular Connection

Adjustable Height

If space is paramount, or you need to be able to store your tables away when not in use, then you'll want to choose a base that allows the table to fold.

6 When reviewing the options consider the maximum table top size and weight the base can support?

You need to ensure that the base you choose supports the size of the table top that you are planning to use.

A base that is too small risks instability and tipping, while one that is too large will appear disproportionate and reduce legroom and circulation space.

Step 3: Select the Ideal Table Top

The top defines the surface experience and visual impact.

Ask Yourself...

1 What material works best?

3 Explore the brands

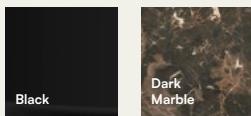

Extrema Table Tops

Built to withstand extreme conditions, both indoors and outside, Extrema Table Tops are manufactured from durable, weather-proof HPL in a wide variety of finishes and are resistant to UV light, heat, stains, and impacts.

Parisian Table tops

French bistro-inspired tops that blend timeless elegance with exceptional resilience. With a bonded laminate surface and contoured metal outer rim, as well as resistance to heat, stains, and impacts.

PARISIAN

TABLE TOPS

EKO Table Tops

Modern and maintenance-free, EKO Table Tops look like wood, but are manufactured from 100% recycled materials that would have gone to landfill. Suitable for indoors and outside, they're weather and UV-resistant.

Tuska Table Tops

Crafted from high-quality Robinia wood, Tuska Table Tops are both beautiful and durable. Suitable for outdoor use, the tops feature an attractive slatted design and are available in a variety of shapes and sizes.

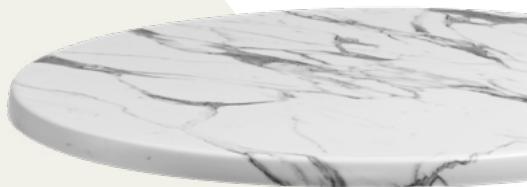

Enduratop Table tops

Weather and rot-proof Enduratop Table Tops offer great value, combining classic good looks with a lightweight yet durable design. They offer excellent resistance to heat, cigarette ash, scratching and staining.

ENDURATOP
TABLE TOPS

SolidGrain Table Tops

Our comprehensive range of solid wood table tops includes oak, ash, and pine in an array of colours and finishes showcasing their unique characteristics. All beautifully crafted for indoor commercial use, the tops are highly durable and built to last.

solid grain
TABLE TOPS

Holz Table Tops

Highly durable yet cost-effective, Holz wood-effect table tops are crafted from MFC with 2mm ABS edging. The tops have an easy-clean, wipeable surface and are available in a range of naturally inspired shades.

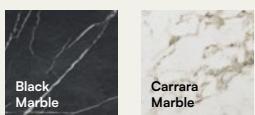

HOLZ
FORMIDABLE TABLE TOPS

Omega Table Tops

Achieve a luxury marble look at a fraction of the cost. Featuring a thick, contract-grade marble effect laminate and attractive gold ABS edging, Omega Table Tops are heat-resistant and easy to keep clean.

White Carrara Marble Table Tops

Add the luxury of genuine marble with our White Carrara Marble Table Tops. Beautiful Italian Carrara marble, with a high-end matte finish is expertly crafted into smooth table tops with rounded edges and radius corners on the square version.

	Holz		25mm MFC (Melamine Faced Chipboard)		
	Omega		25mm Laminate and Gold ABS Edging		
	White Carrara Marble		20mm Genuine White Carrara Marble		

5 Weight & Compatibility

Choosing the right table isn't only about the look of the top - it's about ensuring the base and top work together safely and effectively. The weight of each top, shown in the comparison table below, should always be matched with a base that can support it.

- Always check that the base remains stable under the top's load.
- Matching weight and base design ensures durability and prevents wobbling.
- Compatibility between top and base makes installation smoother and extends the life

Available Table Sizes (cm)	Round						Square				Rectangular			
	60	69/70	75	80	90	120	60x60	69x69/ 70x70	79x79/ 80x80	90x90	110x60	119x69/ 120x70	179x69/ 180x70	180x75

6 Fixings & Compatibility

Aligned fixings matter. Bolt patterns, brackets, and mounting methods all ensure stability and safety.

All our table bases come complete with fixings for secure and easy assembly.

When sold with a table top (except solid wood), the top is pre-drilled to match the base - making setup quick and effortless.

If purchased separately, tops may require drilling to suit your chosen base.

Consistent alignment means less downtime, faster installation, and peace of mind for busy hospitality venues.

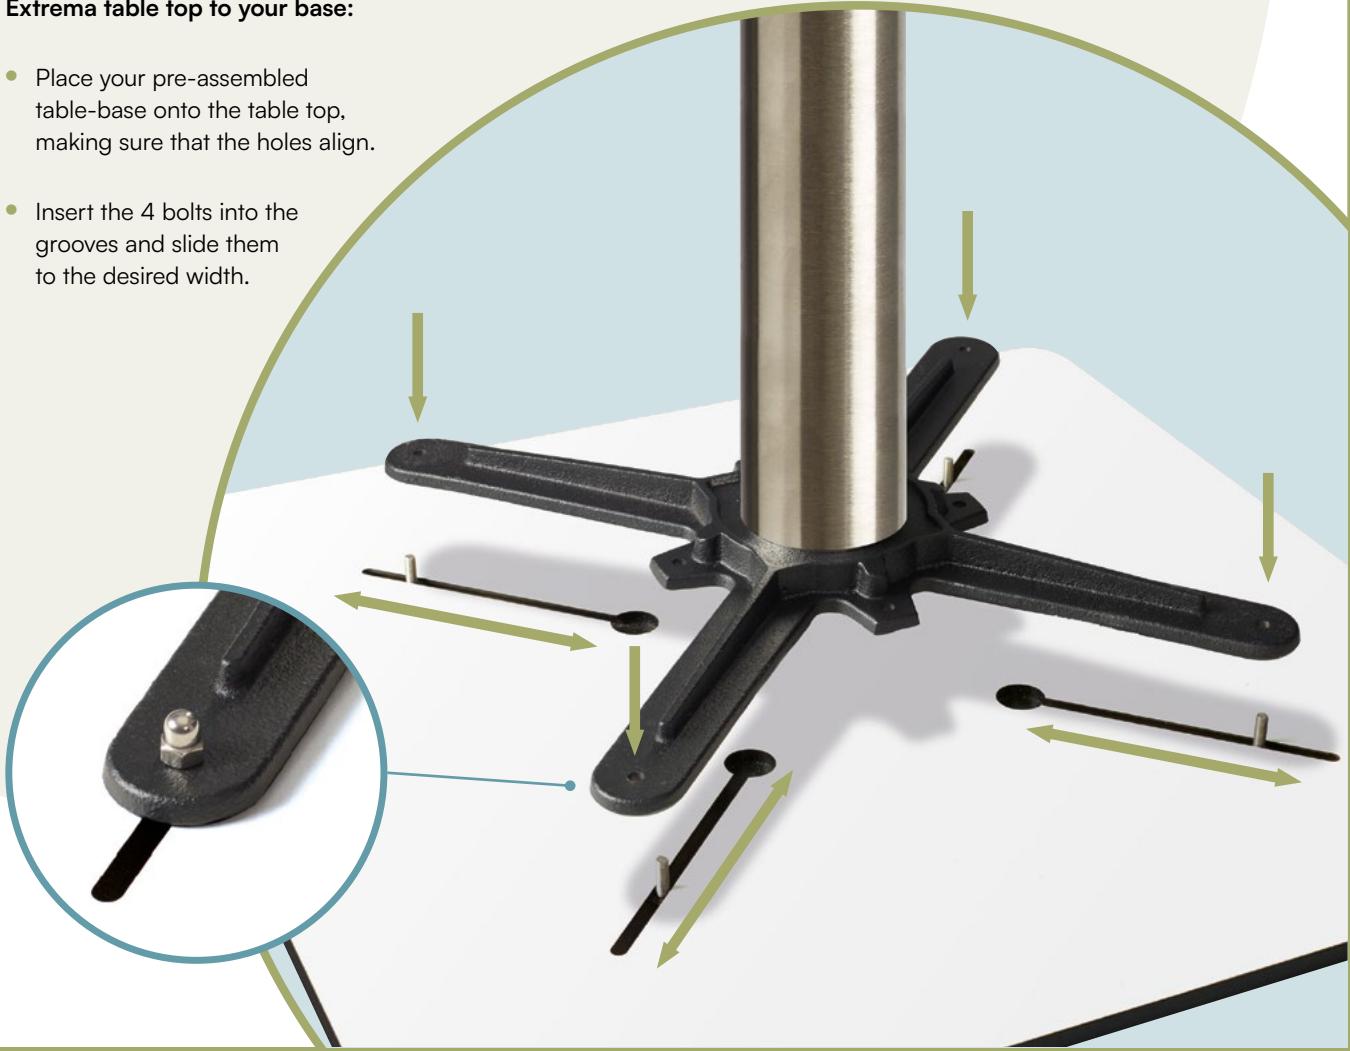

Extrema EASYFIX System

With our innovative EASYFIX system, Extrema table tops can be quickly and securely fitted onto a wide range of bases, offering a seamless installation experience.

It couldn't be easier to fix your new Extrema table top to your base:

- Place your pre-assembled table-base onto the table top, making sure that the holes align.
- Insert the 4 bolts into the grooves and slide them to the desired width.

Step 4: Pairing Base and Top Successfully

Now bring it all together to complete your vision.

Finally Ask Yourself...

1 Which top - and - base duo will you go for?

Here are just a few of our favourite combinations of tops and bases, from classic to contemporary and for indoor and outside...

Indoor Complete Tables

Rustic Solid Oak Table Top in Smoked (120cm)
Moderno Large Round Dining Height Base in Black/Gold

Omega Table Top in White (80x80cm)
Castano B2 Dining Height Base in Black

Parisian Table Top in Black (70cm)
Nevada Dining Height Base in Black

Outdoor Complete Tables

Extrema Table Top in Cement (120x70cm)
Arno Deluxe Black Double Dining Flip Top Base

EKO Table Top in Black (80cm)
Evo Trumpet Style Black Large Dining Height Base

Tuska Table Top (80x80cm)
Bison Square Black Dining Table Base (77.5x77.5cm)

2 Is this setup future-proof? Can I swap tops or adjust heights later?

Tables aren't just about today's needs - they should adapt as your venue evolves. Consider whether bases allow you to swap tops for a fresh look or different function, and whether adjustable heights can give you flexibility between dining, lounge, or bar service.

Choosing adaptable designs helps ensure your investment keeps pace with changing layouts, guest expectations, and service styles.

3 Will this be easy to clean and maintain over time?

- **Stain-resistant finishes work well in cafés, bars, and high-turnover dining spaces.**
- **Durable bases resist scuffs and scratches from chairs and foot traffic.**
- **Low-maintenance materials like recycled plastic, HPL, or polypropylene suit busy outdoor areas.**
- **Premium finishes such as marble or solid wood add elegance but need regular care.**
- **Easy-clean surfaces keep service efficient, while low-maintenance choices reduce long-term costs and staff effort.**

- Easy-clean surfaces keep turnover fast and service efficient.
- Choosing low-maintenance materials reduces long-term costs and staff effort.
- Premium materials like marble or wood elevate the look but require more upkeep - balance style with practicality.
